Preparing Caring Professionals to serve, to lead, to teach.

• Program designed to meet the needs of working educators who desire to support students to “fulfill personal ambitions and career goals in an ever-changing world” (NCTM, 2000).
• Focuses upon effective pedagogies from the real world context of teaching subject matter curriculum.
• Inquires into current issues, trends, and research in math education in the context of meeting the learning needs of diverse student populations.
• Plan of study addresses practices that promote social justice and equity.
• Project work focuses on engaging and meeting the learning needs of at-risk urban youth.
• Develops innovative math educators who are confident leaders in their field.
