Kaiser Permanente’s founding principles of partnership, integration, and prevention have been central to our success for more than 60 years.

Today, we continue to thrive through the fundamental and unique partnerships within our organization: the physician and patient relationship, the collaboration between labor and management, and the shared leadership by the health plan and the medical groups. We also take pride in our distinctive ability to link clinical research to improved care delivery, invest in the communities we serve, and coordinate care across inpatient, outpatient and ancillary services.

To continue our success, we are committed to employee development. Our fellowship program recognizes talented early careerists who can develop their skills and leadership potential in a dynamic and unique environment.

The Kaiser Permanente Postgraduate Fellowship Program in Health Care Administration is designed to:

- Identify promising candidates for management and future leadership positions within Kaiser Permanente
- Provide Fellows with an educational, interactive, and enriching experience that will contribute to their professional development, as well as to their understanding of Kaiser Permanente
- Foster an environment that promotes and nurtures the development of future health services managers and administrators through mentoring, exposure, and active participation in the operations of medical centers and regional departments
- Create opportunities for Fellows to enhance skills in project development, strategic implementation, and operations management

Applications must be received by October 1, 2015

For application instructions and more information, please visit our website: http://adminfellowship.kp.org

Fellowships are available in both our Northern and Southern California regions beginning in Summer 2016
